Product Details

With the AVerDVR POS Capture Box, you can integrate your Point of Sale (POS) equipment with the AVerDVR NV series or any surveillance system that supports POS feature. It transmits the transaction data to both the POS printer and the surveillance system. This way the transaction data can be overlayed onto the surveillance video as well as kept in the event log. With this information, you can then monitor, record and keep track of items that were sold from the POS.
